

HIGH PRESSURE GEAR PUMP WP900D

THE NEW D-DESIGN WITH HIGHER CAPABILITY

Since many years the W900 series pumps and motors from Haldex Hydraulic Systems are well known to the market for high performance and reliable duty.

WP900D is a development from the well known W900 series. The D-design enables higher pressure capability at displacements above 19 cc. Configurations are available with multiple pumps, larger and/or smaller pump ranges for optimizing the system, sealed sections to enable separate fluids and of course the typical Haldex integrated valve options.

WP900D - Pump Information

Displacement range

- Displacements from 16 to 31cc

Special design features

- Increased pressure capability for higher displacements (> 19cc) compared to WP09A-Design
- SAE "A" and SAE "B" interfaces

Design options

- Multiple pumps available
- Combination with other pump ranges
- Double shaft seal
- In-between-sealed sections
- Seal material NBR, FKM optional
- Integrated valving
